IN THE CLAIMS:

Please amend the claims as indicated in the complete listing of claims provided

below.

1. (Currently Amended) A method of managing file extensions in a digital processing

    system with a user interface and a plurality of files, each file having a name that

    comprises a filename and an extension, said method comprising:

    associating a file with an indicator, the indicator being ~~which is~~ separate from an

    ~~extension, the indicator being and which is user selectable for a single file in~~
